

Face to face public meetings at Salford Civic Centre

Face to face public meetings are being held in Old Town Hall Building at the Civic Centre and currently most meetings are being held in The Salford Suite, the Council Chamber and in the next couple of months the committee rooms will re-open. The venue for each meeting is shown on the agenda for each meeting and these are published on the city council website [here](#).

1. Important information for attending public meetings in the Salford Suite

a. Where to enter the building

You must enter the building by the main front door of the Old Town Hall building. You will need to be let into the building as a pass is required so an officer from Democratic Services should be on hand to direct you safely to The Salford Suite. *For evening meetings, if you cannot get access via the main front door please walk around to the main Reception and press the out of hours buzzer to gain access.*

b. Areas of the building that are closed to people attending meetings

- Other members of the public are also using the building to access the Registrars offices and the ceremony rooms and arrangements **and to help us manage the numbers of people in the building so access is restricted to the Registrars corridor and the ceremony room's corridor during the day.**

c. Accessible access to the Council Chamber

The public gallery for the Council Chamber is accessed by a staircase. If this is not suitable for you there are spaces in the council chamber available for the public who cannot access the gallery. To access these spaces, please email decisionmakingandscrutiny@salford.gov.uk a few days in advance of the meeting (if possible) and the clerk for the meeting will arrange this for you.

d. Toilets

- The toilets on the first floor on the committee room corridor **must** be used. **The Registrars corridor will not be open to members, officers and members of the public attending meetings in The Salford Suite during the day.**
- The accessible toilet can be used on the Registrars corridor if required.

2. What to do if you have symptoms of a respiratory infection, including COVID-19, and have not taken a COVID-19 test.

The advice on the [gov.uk website](https://www.gov.uk) says:

- Try to stay at home and avoid contact with other people if you have symptoms of a respiratory infection, such as COVID-19, and you have a high temperature or do not feel well, try to stay at home and avoid contact with other people, until you no longer have a high temperature (if you had one) or until you no longer feel unwell.
- If you leave your home while you have symptoms of a respiratory infection, and you have a high temperature or feel unwell, the following actions will reduce the chance of passing on your infection to others:
 - wearing a well-fitting face covering made with multiple layers or a surgical face mask
 - avoiding crowded places such as public transport, large social gatherings, or anywhere that is enclosed or poorly ventilated
 - covering your mouth and nose when you cough or sneeze; wash your hands frequently with soap and water for 20 seconds or use hand sanitiser after coughing, sneezing and blowing your nose and before you eat or handle food and avoid touching your face.

3. What to do if you have a positive COVID-19 test result

The advice on the [gov.uk website](https://www.gov.uk) says:

- Try to stay at home and avoid contact with other people if you have a positive COVID-19 test result, it is very likely that you have COVID-19 even if you do not have any symptoms. You can pass on the infection to others, even if you have no symptoms.
- Many people with COVID-19 will no longer be infectious to others after 5 days. If you have a positive COVID-19 test result, try to stay at home and avoid contact with other people for 5 days after the day you took your test. At the end of this period, if you have a high temperature or feel unwell, try to follow this advice until you feel well enough to resume normal activities and you no longer have a high temperature if you had one.
- Although many people will no longer be infectious to others after 5 days, some people may be infectious to other people for up to 10 days from the start of their infection. You should avoid meeting people at higher risk of becoming seriously unwell from COVID-19, especially those whose immune system means that they are at higher risk of serious illness from COVID-19, despite vaccination, for 10 days after the day you took your test.
- If you leave your home during the 5 days after your positive test result the following steps will reduce the chance of passing on COVID-19 to others:
 - wear a well-fitting face covering made with multiple layers or a surgical face mask.
 - avoid crowded places such as public transport, large social gatherings, or anywhere that is enclosed or poorly ventilated.
 - cover your mouth and nose when you cough or sneeze; wash your hands frequently with soap and water for 20 seconds or use hand sanitiser after coughing, sneezing and blowing your nose and before you eat or handle food; avoid touching your face.
